### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Milan Kapadia on Jan. 29, 2010.

2. The application has been amended as follows:

28. **(Currently amended)** A computer-implemented method for classifying network resources, comprising:

by a computerized system that comprises one or more computing devices:

selecting a network resource to be classified, wherein the network resource is selected based at least partly on usage statistics reflective of actual usage of the network resource by users;

in response to the selection of the network resource, outputting an identifier of the network resource for presentation to each of a plurality of users via a user interface that provides functionality for the users to vote on a classification of the network resource, said user interface enabling each user to select a classification from a plurality of predefined classifications;

recording a plurality of votes cast by the plurality of users via the user interface, each ~~such of the plurality of the~~ votes designating a classification selected by a respective user for the network resource; and

assigning a classification to the network resource based at least partly on the recorded plurality of the votes of the plurality of users, wherein the classification of the network resource is assigned if a predetermined number of votes having the same classification is received.

wherein the predetermined number of votes corresponds to at least a predefined percentage of the number of said plurality of votes.

35. **(Currently amended)** A system for classifying network resources, the system comprising:

a computer data repository that stores usage statics data reflective of usage levels of each of a plurality of network resources by network users; and

a computer system programmed, via executable instructions represented in computer storage, to assign classifications to particular network resources according to a process that comprises:

selecting, based at least partly on the usage statistics data, a network resource to be classified;

outputting an identifier of the selected network resource for presentation to each of a plurality of users via a user interface that provides functionality for the users to vote on a classification of the selected network resource, said user interface enabling each user to select a classification from a plurality of predefined network resource classifications;

recording a plurality of votes cast by the plurality of users via the user interface, ~~each~~ of the plurality of the votes designating a classification selected by a respective user for the selected network resource; and

assigning a classification to the selected network resource based at least partly on the recorded votes of the plurality of users, wherein the classification of the network resource is assigned if a predetermined number of votes having the same classification is received, wherein the predetermined number of votes corresponds to at least a predefined percentage of the number of said plurality of votes.

**47. (New)** The method of claim 28, further comprising, in response to determining that the plurality of votes are not sufficient to assign a classification, outputting the identifier of the network resource for presentation to at least one additional user via the user interface to obtain at least one additional vote.

**48. (New)** The system of claim 35, wherein the computer system is additionally programmed to respond to a determination that the plurality of votes are not sufficient to assign a classification by outputting the identifier of the network resource for presentation to at least one additional user via the user interface to obtain at least one additional vote.

3. Claims 28-48 are allowable over prior art of record.
4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to HUSSEIN A. EL CHANTI whose telephone number is (571)272-3999. The examiner can normally be reached on Mon-Fri 8:30-5:00.
